### **Company Description**

IANUS Consulting Ltd is a SME that conducts research in the security domain, develops innovative solutions, and provides consultancy and management services to its clients in both the public and the private sector.

### **Cybersecurity Consultant**

**Location:** Larnaca, Cyprus

#### **Short job description:**

IANUS is looking for a cybersecurity consultant with deep understanding on cybersecurity policies, methodologies and the whole cycle of the cybersecurity risk management. Related certificates are an added value for any candidate regardless the academic level. Candidates will be preferred if they have experience in working with information security and knowledge of penetration testing, network security, and the techniques used to expose and correct security flaws. They will become a member of a very dynamic research team, and they will be given the training, assistance, and opportunities to develop and increase their skills in this competitive area. Remuneration depends on university degree level and previous working experience.

Candidates should be graduates of technical disciplines of well-established European Universities. Other candidates from recognized institutions are also welcome.

#### **Primary Job duties**

As a Team member, you will focus on the implementation and management of European and National research projects in the field of cybersecurity, and you will undertake the following main activities and responsibilities:

- Monitoring of suitable European innovation dedicated funding schemes;
- Monitoring and follow-up of project activities.
- Provide inputs in scientific and research reports.
- Participate in project meetings and teleconferences.
- Participate in EU-level working groups and platforms, representing IANUS strategic interests.
- Prepare project reports and project deliverables.
- Undertake ISO27001 implementation activities

- Undertaking tasks in consultancy projects related but not limited to Management Systems, Risk Assessment, Information Classification, Security Awareness, Compliance, ISO/IEC 2700x, PCI-DSS, GDPR
- Assess clients against a wide variety of security and compliance frameworks including, GDPR, ISO/27001/2 etc.
- Lead customer risk management engagements and formalized risk analysis engagements and develop recommendations for remediating risk and compliance gaps.
- Conduct document reviews and interviews against compliance requirements and best-practices
- Write deliverable reports

### **Employment Terms**

The position is on a contract basis. Initially, a three-year contract will be offered, which is renewable based on performance for multiple years and beyond the scope of the assigned project (s). The gross monthly salary depends on the candidate's qualifications and experience. The executive period of employment begins as of the effective date and shall continue thereafter for a period of three (3) years. If mutually agreed between IANUS Consulting Management Team and the Contractor, the contract may be renewed under the same terms and conditions.

### **Knowledge, skills and ability**

- University degree in computer science, computer engineering, or a related technical discipline, with an emphasis on cybersecurity; or bachelor's degree in these disciplines with relevant experience. The possession of a Ph.D. degree is a plus.
- Professional certifications such as CISSP, CISM, CEH, OSCP, CompTIA Security+, ISO 27001 Auditor are highly desirable.
- Strong understanding of current cybersecurity threats, attack vectors, and mitigation techniques.
- Proficiency in using security tools and technologies, such as firewalls, intrusion detection/prevention systems, endpoint protection, and SIEM solutions.
- Familiarity with security standards, regulations, and laws, such as ISO27001, GDPR, CCPA, HIPAA and PCI-DSS.
- Excellent problem-solving and analytical skills, with the ability to assess complex security situations and develop effective solutions.
- Availability to travel for partner meetings and events abroad.
- Proficiency level in English.

### **Profile of the ideal candidate**

- Good team worker.
- Good organizational and time management skills.
- Be systematic and consistent.

- Able to multitask.
- Able to communicate with colleagues and collaborators at all levels, in a professional manner.
- Dynamic, trustworthy, and committed.

**Working with us, you will expect**

- A unique opportunity for a career in a European-oriented company and self-development.
- Attractive compensation package based on qualifications and experience.
- Youthful and professional work culture and environment.
- International and highly competitive environment in contact with leading-edge technology.
